PROJECT NAO

Robot NAO like a new learning tool, he helps students to learn about programming

More on
robotnao.sk

- First and biggest project I was managing was dealing with a new way of teaching programming on Slovak school with robot NAO platform. Co-operation with company named Aldebaran Robotics (SoftBank Robotics) brings 47 successful integration in many schools.

CORE FEATURES

YOUR CONTROL

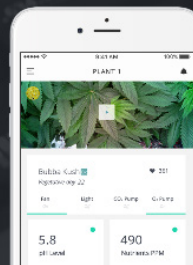

Control your watering, lighting and ventilation. Or set timer on it.

NO REBUILDING

You don't need to rebuild your system, units are adaptable to any system. Our team help you with integration.

ANYWHERE

Control anywhere in the world, only need internet connection.

PROJECT SGB

Smart Grow Box, project focused on intelligent growing system for bio-farms and homes

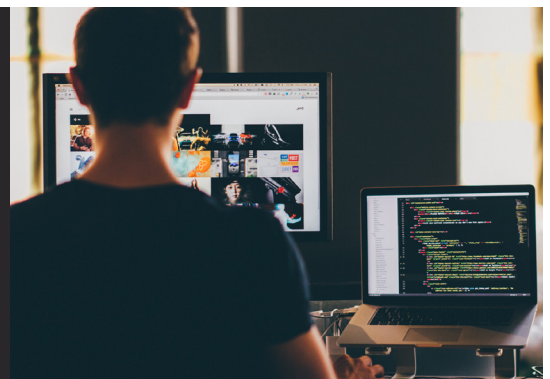

More on
smartgrowbox.com

- Denkovi AE LTD company has provided hardware that enables processing of input values. I suggested and transferred backend and frontend application that communicates with smart unit to a working condition.

PROJECT WEB-MEDIA

Web-media is small Advertising agency

More on
web-media.sk

- The main focus is offering services in web development, marketing, graphic and illustrations.
